GUARANTEE**

Authenticate and Register your Royal Doulton[®] Elite Drinking Water Filter

Preparing the Filter for use

Extreme cleanliness is important. Wash hands before handling the product and take care to ensure that no contamination of the components occurs during assembly

Installation

When installing a new filter candle it is important to condition the filter with the incoming water using the following procedure:

	Rated Service Flow for Optimum Performance	Filter Capacity
Elite	0.5 USGPM/1.9 LPM	1000 USG/3785 L

Pressure Filters

- Check that the rubber O rings are in place on the threaded mount
- Screw the candle into the housing, ensuring that a seal is made with the O ring(s). Do not over tighten
- Open the isolation valve/tap to allow water to flow through the filter to waste for 10 minutes
- Allow the filter to stand unused overnight
- Open the tap again for 10 minutes and allow water to run to waste. **The filter is now ready for use**
- After conditioning the filter it is important to fit a new CR 2032 3V battery to reset your LED indicator on the tap. Please follow the instructions supplied with your Royal Doulton[®] Elite housing

Operation

Due to filtration of particulate contaminants from the water during use, the flow of water from the filter may reduce over a period of time. To restore the water flow to its normal level, remove the filter and scrub the surface evenly with a clean abrasive kitchen pad under running water or in a bowl, ensuring that the open ended plastic mount is clear of the water, to avoid contamination

The unique 10 digit authenticity code printed on your Royal Doulton[®] Elite water filter enables you to authenticate and register your product directly with Doulton[®].

This gives you the reassurance that you have purchased a genuine Royal Doulton[®] product that has been precision made, in England, to the highest standards.

Authenticity and registration of your Royal Doulton[®] water filter can be completed online by visiting:

www.doulton.com

To ensure an accurate match with the Royal Doulton[®] database please, carefully, input both the Product Reference Code and the Unique Authenticity Code (indicated above) and follow the instructions on screen or download the Royal Doulton[®] App and scan the QR code on the filter candle.

The App can be used to check the remaining service life of your ceramic filter, it will remind you when to replace the filter and assist you in reordering filters.
